

# KB1031 How to play Age of Empires II HD on Voobly

There exists a compatibility patch which allows you to play the classic version of the game with other players on Voobly. However, some advanced features such as watching recorded games require to launch single player through the Voobly client.

## Warning

Please keep in mind, that this is a third party patch which is not supported by Voobly. You use it at your own risk!

## Known limitations

- When playing on Voobly (in compatibility mode) not all Age2HD features will work. The major ones, such as, HD resolutions are supported through different implementations than in HD.
- Steam workshop mods won't work, however, you can instead use the [Voobly Mod Center](#).
- You cannot watch recorded games played in AoE2HD on Voobly and vice versa due to different game versions.
